until you have found optimal reception

To improve radio reception:

- For FM, extend, incline and turn the telescopic antenna. Reduce its length if the signal is too strong.
- For AM, the set uses a built-in antenna. Direct this
 antenna by turning the whole set.

Programming tuner stations:

You can store up to a total of 30 radio stations in the memory, manually or automatically (Autostore).

Autostore

Automatic programming will start from preset 1. The set will only program stations which are not in the memory already.

- Press ALBUM / PRESET- or + once or more to select the preset number .
- 2. Press **PROG** for 4 seconds or more to activate auto store programming.
 - → Display: RÜTOSTÖRE is shown and available stations are programmed in order of waveband FM, followed by AM, preset 1 station will then be played after all stations are stored automatically.

Manual programming

- Tune to your desired station (see Tuning to stations).
- Press PROG to activate programming.
 → Display: program flashes.
- 3. Press ALBUM / PRESET- or + once or more to allocate a number from 1 to 30 to this station.
- 4. Press PROG again to confirm.
 - Display shows the preset number, waveband and the frequency of the preset station.
- Repeat the above four steps to store other stations.

Note: You can erase a preset station by storing another frequency in its place.

To listen to a preset station

Press **ALBUM / PRESET-** or **+** once or more until the desired preset station is displayed.

GAMESOUND / USB PC LINK
